

Artwork setup for Formecutting

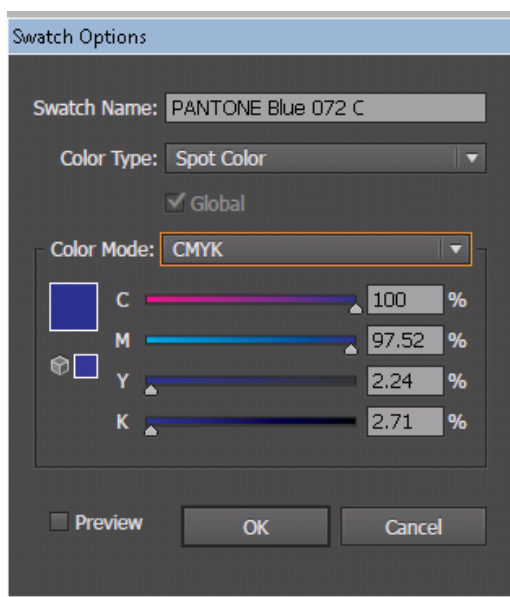

1. In Illustrator/InDesign – Open Pantone Solid coated Swatch Book from the swatch window

2. Select Pantone 072

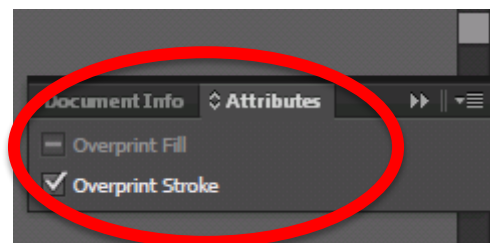

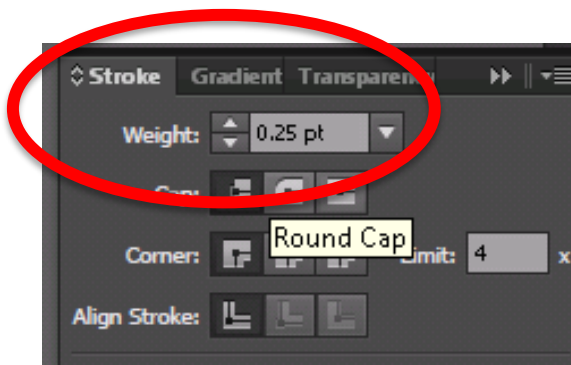

3. Rename the Pantone colour to knife
From your swatch window, double click the new colour
Change the colour mode to CMYK
Manually rename to knife (all lower case)

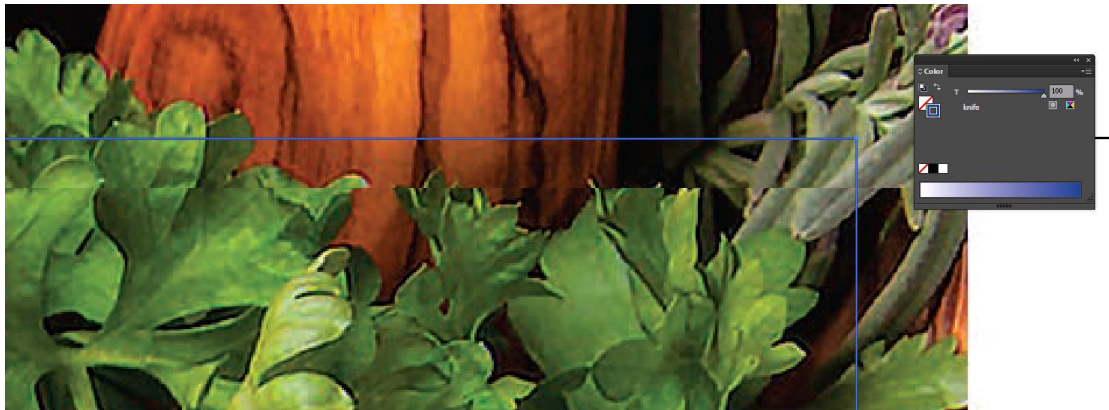

Artwork setup for Formecutting

4. Create the knife line
Then group the artwork that needs to be Formecut
Select the grouped artwork and click the stroke option from the colour window
From the swatches menu, select the new knife colour
Set the stroke weight to 0.25
Then set the stroke to overprint.

5. Check the knifeline by zooming in on the artwork.

6. You can alternatively check the knife, once a print ready pdf has been created and turn on output preview in acrobat.
