UV SPOT GLOSS - CREATING YOUR ARTWORK

Creating Spot Gloss 'uv' colour:

Elements to be in spot UV:

1. Create Swatch colour Pantone 102 into the Swatches palette
2. Double click open the Swatches palette and update:
 - Swatch Name to 'uv'
 - Colour Type to 'Spot'
 - Colour Mode to 'CMYK'
3. Select uv items and set to 'Overprint Fill / Stroke' as appropriate using Attributes
4. Ensure all spot UV elements are put onto its own layer named 'uv'

FOR THE BEST RESULTS:

Creating Spot Gloss 'uv' colour:

- Spot Gloss is available on 420gsm with a matt laminate
- Spot Gloss can be used to the edge, cut and folded
- Limit the use of the varnish; embellish your artwork (don't use it for an area larger than 5cm x 5cm)
- Avoid very fine text
- Place artwork into Photoshop, set image to 360dpi and zoom in to the maximum, ensure areas are 3 pixels solid (100% filled pixels). Spacing between gaps also have to be 3 solid pixels
